## EGF Receptor (EGFR) Trafficking Pathways: From Epithelial Cell Functions to Epithelial Carcinomas

Guest Editor:

**Prof. Cathleen R. Carlin**

Department of Molecular Biology and Microbiology, Case Comprehensive Cancer Center, School of Medicine, Case Western Reserve University, Cleveland, OH 44106, USA

Deadline for manuscript submissions:

**closed (31 December 2022)**

### Message from the Guest Editor

Dear Colleagues,

I hope this message finds you and those you hold dear safe and in good health during these challenging times.

I am reaching out to let you know that we are organizing a Special Issue on ‘EGF Receptor Trafficking Pathways: From Epithelial Cell Functions to Epithelial Carcinomas’ that we think you may be interested in contributing to.

Your expertise in the field will be a valuable contribution to this Special Issue. Apart from potential research articles that you might consider to submit, I encourage you and your co-workers to prepare a review on any basic or applied topic which could contribute to the advancement and understanding of physiological EGF receptor biology in polarized epithelial cells, its misappropriation in epithelial carcinomas, and the current state of therapeutic strategies for overcoming resistance to EGF receptor-targeted drugs.

We are looking forward to your positive reply to this call!

Stay safe and healthy.

Prof. Cathleen R. Carlin

an Open Access Journal by MDPI

## Editors-in-Chief

### **Dr. Alexander E. Kalyuzhny**

Dental Basic Sciences, University of Minnesota, 308 Harvard St. SE, Minneapolis, MN 55455, USA

### **Prof. Dr. Cord Brakebusch**

Biotech Research & Innovation Centre, The University of Copenhagen, Copenhagen, Denmark

## Message from the Editorial Board

*Cells* has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [CAPus / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (Cell Biology) / CiteScore - Q1 (General Biochemistry, Genetics and Molecular Biology)
