Biomarkers for Diagnosis and Treatment of Gynecologic Neoplasms

Guest Editor:

Dr. Ilan Bruchim

Hillel Yaffe Medical Center,
Affiliated with the Ruth and Bruce
Rappaport Faculty of Medicine,
Technion - Israel Institute of
Technology, Haifa, Israel

Deadline for manuscript
submissions:

closed (20 April 2023)

Message from the Guest Editor

Ovarian, endometrial, and cervical cancers are the three most common malignancies of the female reproductive organs, and pose a serious threat to women's health with poor prognosis in advanced stages. Ovarian cancer is the fifth-highest cause of cancer death in women, with more than 200,000 recorded global deaths in 2020. Several studies have provided important insights and molecular tumor characterizations and suggested innovative potential biomarkers for early diagnosis, as well as predictive and prognostic biomarkers.

This Special Issue of *Cells* is aimed at providing a collection of articles dealing with putative biomarkers for the diagnosis and treatment of gynecologic malignancies. In recent years, there has been an enormous effort to develop specific and sensitive biomarkers for the precise screening, diagnosis, prognosis, and monitoring of high-risk cancer. The identification of new biomarkers is a critical step in the improvement of the diagnosis and treatment of gynecologic malignant tumors.

Copenhagen, Copenhagen,
Denmark

Message from the Editorial Board

Cells has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [CAPus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Cell Biology*) / CiteScore - Q1 (General Biochemistry, Genetics and Molecular Biology)
