## Glucocorticoid-Induced Proteins Annexin A1 and GILZ in Inflammation

Collection Editors:

**Prof. Lirlândia P. Sousa**

**Dr. Michelle Sugimoto**

**Dr. Luciana Tavares**

**Dr. Stefano Bruscoli**

### Message from the Collection Editors

Dear Colleagues,

Glucocorticoids (GCs) are endogenous hormones that are critical for organism homeostasis and adaptation to environmental conditions. Because of their anti-inflammatory actions, synthetic GCs are extensively used in clinical practice to treat several inflammatory conditions, representing the first successful use of an endogenous molecule for therapeutic purposes. However, long-term use is limited by the development of serious adverse effects, and administration is discouraged in infectious settings, as the immunosuppressive actions of GC's may favor pathogen propagation. Glucocorticoid-induced leucine zipper (GILZ) and Annexin A1 (AnxA1) are GC-induced proteins intrinsically involved with the anti-inflammatory functions of GCs without the associated adverse metabolic effects. This Special Issue of *Cells* welcomes original articles and reviews covering the broad spectrum of processes in which GC-induced proteins are involved, both in health and disease.

## Editors-in-Chief

### Prof. Dr. Alexander E. Kalyuzhny

Neuroscience, UMN Twin Cities,  
6-145 Jackson Hall, 321 Church St  
SE, Minneapolis, MN 55455, USA

### Prof. Dr. Cord Brakebusch

Biotech Research & Innovation  
Centre, The University of  
Copenhagen, Copenhagen,  
Denmark

## Message from the Editorial Board

*Cells* has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [CAPlus / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (*Cell Biology*) / CiteScore - Q1 (General Biochemistry, Genetics and Molecular Biology)
