Deadline for manuscript  
submissions:

**closed (15 May 2023)**

### **Message from the Guest Editor**

Dear Colleagues,

Globally, nearly 10 million deaths a year are related to cancer. Curative treatments are not guaranteed for patients with metastatic cancers. There is a growing number of engineered cellular immunotherapies (T, NK, dendritic cell, macrophage) under development and they could provide further options for patients. Moreover, rapid advancements in the development of tissues from embryonic and adult stem cells has created newer opportunities to effectively address normal tissue toxicity associated with radio-chemotherapy for cancer patients. Together, these cellular therapeutics will play a major role in individualized cancer management strategies in the clinic.

This Special Issue will highlight emerging stem cell- and immune cell-based therapies for individualized cancer management.

Dr. Nagarajan Kannan

## Editors-in-Chief

### **Prof. Dr. Alexander E. Kalyuzhny**

Neuroscience, UMN Twin Cities,  
6-145 Jackson Hall, 321 Church St  
SE, Minneapolis, MN 55455, USA

### **Prof. Dr. Cord Brakebusch**

Biotech Research & Innovation  
Centre, The University of  
Copenhagen, Copenhagen,  
Denmark

## Message from the Editorial Board

*Cells* has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [CAPlus / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (*Cell Biology*) / CiteScore - Q1 (General Biochemistry, Genetics and Molecular Biology)
