## Autophagy in Anti-tumor Immunity

Guest Editors:

**Dr. Nagireddy Putluri**

Department of Molecular and Cell Biology, Baylor College of Medicine, 120D, Jewish Building, Houston, TX 77030, USA

**Dr. Pierre-Emmanuel Joubert**

Centre de Recherche des Cordeliers, Paris, France

Deadline for manuscript submissions:

**closed (31 August 2023)**

### Message from the Guest Editors

Dear Colleagues,

Since the discovery of this process in the middle part of the 20th century, autophagy has been shown to impact many physiological pathways and diseases. In the majority of cancers, autophagy plays a critical role in the tumor cells behavior, favoring cell survival, proliferation, migration and resistance to anti-tumor therapies. Over the time, it has become clear that the impact of autophagy is not restricted to malignant cells but can be expanded to the tumor microenvironment. Indeed, many reports described an important part for autophagy in the anti-tumor immune response, impacting immune cell survival, proliferation, differentiation as well as the expression and/or secretion of immune-related proteins.

In this special Issue of *Cells*, we invite contributors of original research articles, reviews, or shorter perspective paper on all aspects related to the theme of “autophagy and anti-tumor immunity”. Expert articles describing mechanistic, functional, cellular or general aspects of the role of autophagy in immune cells, immune response or in immunotherapy are highly welcome.

## Editors-in-Chief

### **Dr. Alexander E. Kalyuzhny**

Dental Basic Sciences, University of Minnesota, 308 Harvard St. SE, Minneapolis, MN 55455, USA

### **Prof. Dr. Cord Brakebusch**

Biotech Research & Innovation Centre, The University of Copenhagen, Copenhagen, Denmark

## Message from the Editorial Board

*Cells* has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [CAPus / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (Cell Biology) / CiteScore - Q1 (General Biochemistry, Genetics and Molecular Biology)
