University, Kakuma-machi,  
Kanazawa 920-1192, Japan

Deadline for manuscript  
submissions:

**closed (30 June 2021)**

### **Message from the Guest Editor**

Dear Colleagues,

Nuclear pore complexes (NPC) at the surfaces of nuclear membranes play a critical role in regulating the transport of molecules between the cell nucleus and cytoplasm. Aberrant functions of nucleoporins (Nups) and NPCs have been associated with many diseases, including autoimmune diseases (Nup358/RanBP2), viral infections (Nup358/RanBP2, Tpr, and Nup153), neuronal diseases (RanGAP1), cardiomyopathies (NDC1, Nup160, Nup153, and Nup93), and cancers, especially leukemia (Nup98, Nup214). However, and in spite of the importance of NPCs, we still only have a limited understanding of the spatial-temporal dynamics of NPCs.

In this Special Issue, we invite you to contribute original research articles, reviews, case reports or shorter “Perspective” articles on all aspects related to the theme of “Nuclear Pore Complex in Nanomedicine”. We especially hope to highlight current trends and novel models with functional insights from a cellular and nanoscopic perspective.

Keywords

- Nuclear pore complex
- Cell cycle and cancer
- Imaging and microscopy
- Structure and function
- Nano
- Medicine

Copenhagen, Copenhagen,  
Denmark

## Message from the Editorial Board

*Cells* has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [CAPus / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (*Cell Biology*) / CiteScore - Q1 (General Biochemistry, Genetics and Molecular Biology)
