The Past, Present and Future of NeuroHIV: A Perspective to A Cure

Guest Editor:

Prof. Dr. Eliseo Eugenin

Department of Neuroscience,
Cell Biology, & Anatomy,
University of Texas Medical
Branch (UTMB), Galveston, TX,
USA

Deadline for manuscript
submissions:

closed (30 April 2022)

Message from the Guest Editor

The evolution of NeuroHIV has been remarkable according to the introduction of anti-retroviral treatment. Currently, the NeuroHIV field is changing rapidly and we need to inform the scientific community of the past, current, and future of the field. This Special Issue of *Cells* will focus on integration from patient behavior into basic biology. Finally, we will discuss new avenues of treatment toward preventing the devastating consequences of NeuroHIV and the unexpected branches of our research into numerous human diseases.

Copenhagen, Copenhagen,
Denmark

Message from the Editorial Board

Cells has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [CAPus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Cell Biology*) / CiteScore - Q1 (General Biochemistry, Genetics and Molecular Biology)
