ROS-Mediated Therapeutic Approaches for Cells

Guest Editor:

Dr. Young-IL Jeong

Department of Dental Materials,
College of Dentistry, Chosun
University, Gwangju 61452,
Republic of Korea

Deadline for manuscript
submissions:

closed (31 August 2021)

Message from the Guest Editor

Reactive oxygen species (ROS), in a chemically reactive state, are peroxides, superoxide, hydroxyl radical, singlet oxygen and alpha-oxygen, etc. They have been extensively investigated in the field of cellular metabolism, cell therapy, cancer cell treatment and molecular targeting.

ROS generation and therapeutic approaches should be still explored for overcoming of various diseases.

Some of the topics around ROS generation in the cells and their therapeutic approaches to be tackled in this Special Issue include but are not limited to:

- Cellular mechanism of ROS production;
- ROS-producing agents and their cellular responses;
- ROS-related cell therapy;
- ROS-mediated cancer cell treatment;
- Disease diagnosis using ROS-sensitive mechanism.

Editors-in-Chief

Prof. Dr. Alexander E. Kalyuzhny

Neuroscience, UMN Twin Cities,
6-145 Jackson Hall, 321 Church St
SE, Minneapolis, MN 55455, USA

Prof. Dr. Cord Brakebusch

Biotech Research & Innovation
Centre, The University of
Copenhagen, Copenhagen,
Denmark

Message from the Editorial Board

Cells has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Cell Biology*) / CiteScore - Q1 (General Biochemistry, Genetics and Molecular Biology)
