Ave, HSE1645, Box 0556, San  
Francisco, CA 94143-0556, USA

Deadline for manuscript  
submissions:  
**closed (31 August 2020)**

### **Message from the Guest Editor**

Dear Colleagues,

The importance of sex as a biological variable has become increasingly apparent. In research design and data interpretation, the consideration of sex as a variable or confound is critical for validity and generalizability of research findings. All sex differences in expression and signaling cannot be explained by sex hormones alone. Often, the same disease has sex-specific outcomes, but the cellular, molecular, and physiological basis for these differences are poorly understood. Understanding and defining sex-specific signaling pathways that operate at baseline and in diseased states are key to designing effective therapeutics.

This Special Issue aims to summarize the current knowledge on known differences in signaling and behavior between the sexes.

We look forward to your contributions.

Prof. Aditi Bhargava

## Editors-in-Chief

### **Prof. Dr. Alexander E. Kalyuzhny**

Neuroscience, UMN Twin Cities,  
6-145 Jackson Hall, 321 Church St  
SE, Minneapolis, MN 55455, USA

### **Prof. Dr. Cord Brakebusch**

Biotech Research & Innovation  
Centre, The University of  
Copenhagen, Copenhagen,  
Denmark

## Message from the Editorial Board

*Cells* has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [CAPlus / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (*Cell Biology*) / CiteScore - Q1 (General Biochemistry, Genetics and Molecular Biology)
