Message from the Guest Editor

Dear Colleagues,

Skin research has extremely varied aspects, as the skin is a complex organ and in close connection with other systems, such as immunity, the nervous system, or the vascular network. In the skin itself, the study of healthy skin can concern these interactions, as well as the different components of the epidermis, dermis, or hypodermis. As for dermatology, it is probably the medical specialty with the greatest number of diseases. This Special Issue edition is open to all aspects of skin research, from basic and translational to clinical and therapeutic research.

Prof. Dr. Laurent Misery

SE, Minneapolis, MN 55455, USA

Prof. Dr. Cord Brakebusch

Biotech Research & Innovation
Centre, The University of
Copenhagen, Copenhagen,
Denmark

Message from the Editorial Board

Cells has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Cell Biology*) / CiteScore - Q1 (General Biochemistry, Genetics and Molecular Biology)
