Deadline for manuscript submissions:

**closed (15 June 2023)**

### Message from the Guest Editor

Dear Colleagues,

Since its initial discovery nearly 40 years ago, the WNT signalling pathway continues to provide a rich avenue for research. The pathway is highly conserved and regulates a wide range of cellular functions during development and adulthood. For example, in development, it can influence cell proliferation, cell fate determination, apoptosis, cell migration, and cell polarity. In adults, it has been linked to epistasis and stem cell maintenance as well as a range of diseases. This collection will focus on the emerging topics in the wide-ranging field of WNT signalling.

Dr. Nicholas Tolwinski

## Editors-in-Chief

**Prof. Dr. Alexander E. Kalyuzhny**

Neuroscience, UMN Twin Cities,  
6-145 Jackson Hall, 321 Church St  
SE, Minneapolis, MN 55455, USA

**Prof. Dr. Cord Brakebusch**

Biotech Research & Innovation  
Centre, The University of  
Copenhagen, Copenhagen,  
Denmark

## Message from the Editorial Board

*Cells* has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [CAPlus / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (*Cell Biology*) / CiteScore - Q1 (General Biochemistry, Genetics and Molecular Biology)
