## Normal and Deregulated Coordination of the Kidney Gonadal Axis by the Wnts

Guest Editors:

**Prof. Dr. Seppo Vainio**

Biocenter Oulu, Laboratory of Developmental Biology, Faculty of Biochemistry and Molecular Medicine, Borealis Biobank of Northern Finland, InfoTech, University of Oulu, Oulu, Finland

**Prof. Dr. Florence Naillat**

Biocenter Oulu, Laboratory of Developmental Biology, Faculty of Biochemistry and Molecular Medicine, University of Oulu, Oulu, Finland

Deadline for manuscript submissions:

**closed (31 March 2020)**

### Message from the Guest Editors

Dear Colleagues,

In this Special Issue of *Cells*, we invite contributions in the form of original research articles, reviews, or shorter perspective articles on all aspects related to the theme of “Wnt signaling in kidney and sex organ diseases”. Articles with mechanistic and functional insights from an organ and disease or a molecular biological perspective are especially welcome. Relevant topics include, but are not limited to:

- Wnt signaling and kidney development
- Wnt and kidney diseases
- Wnt signaling and reproductive organ development
- Wnt and reproductive organ diseases
- Wnt signaling and environmental impact
- Wnt and cancer
- Therapeutic implication in Wnt-associated diseases

### Keywords

- kidney injury
- urogenital system
- Wnt signaling
- extracellular vesicles (EVs)
- cancer
- treatments
- reproductive organs

## Editors-in-Chief

### **Prof. Dr. Alexander E. Kalyuzhny**

Neuroscience, UMN Twin Cities,  
6-145 Jackson Hall, 321 Church St  
SE, Minneapolis, MN 55455, USA

### **Prof. Dr. Cord Brakebusch**

Biotech Research & Innovation  
Centre, The University of  
Copenhagen, Copenhagen,  
Denmark

## Message from the Editorial Board

*Cells* has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [CAPlus / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (*Cell Biology*) / CiteScore - Q1 (General Biochemistry, Genetics and Molecular Biology)
