The Role of Adipose-Derived Stem Cells in Neural Regeneration

Guest Editors:

Prof. Dr. Silvan Maximilian Klein

Klinikum der Universität
Regensburg und Medizinische
Fakultät, Regensburg, Germany

Prof. Dr. Alexandra M. Anker

Department of Plastic, Hand and
Reconstructive Surgery,
University Hospital Regensburg,
93053 Regensburg, Germany

Dr. Oliver Heinrich Felthaus

Department of Plastic, Hand and
Reconstructive Surgery,
University Hospital Regensburg,
Franz-Josef-Strauss-Allee 11,
93053 Regensburg, Germany

Message from the Guest Editors

Peripheral nerve surgery has experienced significant advancements in recent decades thanks to progress in peripheral nerve transfers and the refinement of microsurgical techniques. However, surgical options are still primarily centered on restoring nerve continuity. There is mounting evidence indicating substantial potential for the next phase to encompass the targeted manipulation of nerve regeneration by impacting cellular or hormonal microenvironments. Hence, this Special Issue focuses on fundamental aspects that could foster positive outcomes in nerve regeneration. Manuscripts exploring the analysis and modulation of cellular nerve regeneration via innovative methods in cell cultures, as well as the precise application of growth factors, exosomes, and stem cells, are encouraged to be submitted.

Deadline for manuscript
submissions:

30 September 2024

Editors-in-Chief

Prof. Dr. Alexander E. Kalyuzhny

Neuroscience, UMN Twin Cities,
6-145 Jackson Hall, 321 Church St
SE, Minneapolis, MN 55455, USA

Prof. Dr. Cord Brakebusch

Biotech Research & Innovation
Centre, The University of
Copenhagen, Copenhagen,
Denmark

Message from the Editorial Board

Cells has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Cell Biology*) / CiteScore - Q1 (General Biochemistry, Genetics and Molecular Biology)
