Message from the Guest Editors

Dear Colleagues,

Mitophagy is an autophagic response that targets damaged mitochondria. As the mitochondria are essential to cardiovascular homeostasis in health and disease, maintaining a healthy mitochondrial balance is required and rebalancing the quality and quantity of dysfunctional mitochondria is involved in various therapeutic strategies. In addition, autophagy and mitophagy also play a pivotal role in diabetic cardiovascular diseases, including diabetic cardiomyopathy.

In order to update the new insights on and the intimate connection between autophagy and mitophagy in cardiovascular disorders, we will introduce the genetic and epigenetic role of regulatory factors and maneuvers that alter autophagy and mitophagy flux in various types of cardiomyopathy and cardiovascular diseases.

This Special Issue welcomes manuscripts from original investigations and comprehensive reviews demonstrating new and advanced research viewpoints on the mechanisms of regulating autophagy and mitophagy flux in cardiovascular disease with or without diabetes.

Message from the Editorial Board

Cells has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (Cell Biology) / CiteScore - Q1 (General Biochemistry, Genetics and Molecular Biology)
