## Cancer Immunology: From Molecular Mechanisms to Therapeutic Opportunities

Guest Editors:

**Dr. Fabrizio Mattei**

Department of Oncology and Molecular Medicine, Istituto Superiore di Sanità, Viale Regina Elena 299, 00166 Rome, Italy

**Dr. Carlos Alfaro**

Centre for Applied Medical Research, PamCentre for Applied Medical Research, Universidad de Navarra, Av. Pio XII 55, 31008 Pamplona, Spain

**Prof. Dr. Yona Keisari**

Department of Clinical Microbiology and Immunology, Sackler Faculty of Medicine, Tel Aviv University, P.O. Box 39040, Tel Aviv 6997801, Israel

Deadline for manuscript submissions:

**closed (31 July 2021)**

### Message from the Guest Editors

Dear Colleagues,

Immune cells are important components of the tumor microenvironment, where they play a prominent role in favoring or contrasting cancer progression through direct and indirect activities. Cancer immunology is a growing field that investigates the complex mechanisms and interactions between immune and cancer cells with the aim of identifying therapeutic targets for immunotherapy-based approaches. This Special Issue of *Cells* will present research articles and reviews that cover the scope of tumor immunology. The articles should focus on cellular and molecular mechanisms promoting or hampering immune responses during cancer progression and the suppression of immunity by malignant cells. Furthermore, this Special Issue aims to provide clinical and experimental evidence on how such mechanisms may be translated to immunotherapy and combined therapeutic approaches. All scientists working in these fields are cordially invited to submit their manuscripts.

We are looking forward to your contributions to this Special Issue.

## Editors-in-Chief

### **Prof. Dr. Alexander E. Kalyuzhny**

Neuroscience, UMN Twin Cities,  
6-145 Jackson Hall, 321 Church St  
SE, Minneapolis, MN 55455, USA

### **Prof. Dr. Cord Brakebusch**

Biotech Research & Innovation  
Centre, The University of  
Copenhagen, Copenhagen,  
Denmark

## Message from the Editorial Board

*Cells* has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [CAPlus / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (*Cell Biology*) / CiteScore - Q1 (General Biochemistry, Genetics and Molecular Biology)
