## Cancer Stem Cells (CSC)

Guest Editor:

**Prof. Dr. Ira-Ida Skvortsova**

Head of EXTRO-Lab, Dept. of  
Therapeutic Radiology and  
Oncology, Tyrolean Cancer  
Research Institute, Medical  
University of Innsbruck, Anichstr.  
35, A-6020 Innsbruck, Austria

Deadline for manuscript  
submissions:

**closed (1 February 2021)**

### Message from the Guest Editor

Dear Colleagues,

Cancer stem cells (CSCs) are considered the root of primary and acquired therapy resistances associated with disease progression and poor clinical outcomes in cancer patients. Therefore, an elucidation of the key molecular mechanisms regulating CSC activities could help with the development of novel biomarkers and therapeutic targets to predict or combat the most aggressive malignant tumors in patients. The following aspects of the subject area will be highlighted in this Special Issue:

- signalling pathways;
- CSCs in treatment failure;
- CSC metabolism;
- circadian rhythms in CSCs;
- CSCs and microenvironmental factors;
- biological, biochemical, and pathological methods allowing CSC identification within malignant tumors;
- pediatric tumors and CSCs;
- epigenetic factors in CSC formation;
- glioblastoma stem cells;
- chemical agents against CSCs;
- translational oncology

Prof. Dr. Ira-Ida Skvortsova

## Editors-in-Chief

**Prof. Dr. Alexander E. Kalyuzhny**

Neuroscience, UMN Twin Cities,  
6-145 Jackson Hall, 321 Church St  
SE, Minneapolis, MN 55455, USA

**Prof. Dr. Cord Brakebusch**

Biotech Research & Innovation  
Centre, The University of  
Copenhagen, Copenhagen,  
Denmark

## Message from the Editorial Board

*Cells* has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [CAPlus / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (*Cell Biology*) / CiteScore - Q1 (General Biochemistry, Genetics and Molecular Biology)
