Message from the Collection Editor

Dear Colleagues,

In this Special Issue of the journal *Cells*, I would like to invite you to contribute original research articles, reviews or shorter perspective articles on all aspects related to the theme of “The Role of NLRP3 in Health and Disease”. Expert articles describing mechanistic, functional, cellular, biochemical or general aspects of NLRP3 activation and signaling are highly welcome.

Keywords

- Inflammation
- Innate immunity
- Inflammasomes
- NLRP3-mediated signaling pathways and diseases
- Liver diseases
- Cardiovascular diseases
- Gut-liver axis
- Cancer
- Therapeutic targets

Message from the Editorial Board

Cells has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [CAPus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Cell Biology*) / CiteScore - Q1 (General Biochemistry, Genetics and Molecular Biology)
