## Cell and Gene Therapy of Cancer

Guest Editors:

**Prof. Dr. Chae-OK Yun**

Department of Bioengineering,  
College of Engineering, Hanyang  
University, Seoul, Korea

**Prof. A-Rum Yoon**

Department of Bioengineering,  
College of Engineering, Hanyang  
University, Seoul, Korea

Deadline for manuscript  
submissions:

**closed (31 January 2021)**

### Message from the Guest Editors

Gene therapeutics have been evolving at a rapid pace since the 1990s, and as of 2020, there are 16 types of gene therapeutics that have been commercialized throughout the world. Among these gene therapeutic candidates, virus-mediated gene therapeutics have been approved in Europe (2012) and two other gene therapeutics have been approved in the USA and Europe (2015 and 2016). Based on this current trend, the gene and cell therapeutics field is expected to expand and transform more rapidly.

We will highlight the most cutting-edge discoveries in the translational development of bio-molecular therapeutics for cancer via this issue. Furthermore, as always, our unique focus on development gene and cell therapeutics will allow us to highlight the most exciting high-impact findings.

We will discuss recent advancements and developments in the following areas: (1) oncolytic viruses—specific targeting of tumor and tumor microenvironment, and the tumor-specific expression of therapeutic genes, (2) genetically armed immune regulatory cells/adaptive immune therapies, (3) cancer vaccination strategies, (4) targeting of neo-antigens and tumor stem cells, and (5) non-viral vector delivery.

## Editors-in-Chief

**Prof. Dr. Alexander E. Kalyuzhny**

Neuroscience, UMN Twin Cities,  
6-145 Jackson Hall, 321 Church St  
SE, Minneapolis, MN 55455, USA

**Prof. Dr. Cord Brakebusch**

Biotech Research & Innovation  
Centre, The University of  
Copenhagen, Copenhagen,  
Denmark

## Message from the Editorial Board

*Cells* has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [CAPlus / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (*Cell Biology*) / CiteScore - Q1 (General Biochemistry, Genetics and Molecular Biology)
