MRC Laboratory for Molecular
Cell Biology, London, UK

Deadline for manuscript
submissions:

closed (10 May 2021)

Message from the Guest Editors

Dear Colleagues,

More than 50 lysosomal diseases are now recognized, and rapid advances in molecular diagnostics and therapeutic development are improving speed to diagnosis and treatment options. However, a thorough understanding of this organelle, its interactions within cell signaling and metabolism, connections with other organelles, and how lysosomal disease gene mutations lead to cellular dysfunction and loss remains a major area of research. Further advances are needed to establish the mechanisms of diseases arising from this organelle in order to succeed in developing new therapies. This Special Issue aims to bring together recent discoveries in the molecular and cellular aspects of lysosomal and associated diseases, with an emphasis on hereditary lysosomal diseases, but also in disease areas where lysosomal dysfunction plays a role.

We invite you to submit your research reports and review articles for publication consideration and are looking forward to your contributions to this Special Issue.

Dr. Susan L. Cotman

Special Issue

cells

an Open Access Journal by MDPI

Editors-in-Chief

Dr. Alexander E. Kalyuzhny

Dental Basic Sciences, University of Minnesota, 308 Harvard St. SE, Minneapolis, MN 55455, USA

Prof. Dr. Cord Brakebusch

Biotech Research & Innovation Centre, The University of Copenhagen, Copenhagen, Denmark

Message from the Editorial Board

Cells has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [CAPus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (Cell Biology) / CiteScore - Q1 (General Biochemistry, Genetics and Molecular Biology)
