## Molecular Mechanisms in Organ Fibrosis

Guest Editors:

### Dr. Maurizio Onisto

Department of Biomedical Sciences, University of Padova, 35100 Padua, Italy

### Dr. Valentina Masola

1. Department of Biomedical Sciences, University of Padova, 35100 Padua, Italy  
2. Division of Nephrology and Dialysis, Department of Medicine, University of Verona, Piazzale A. Stefani 1, 37126 Verona, Italy

Deadline for manuscript submissions:

**closed (10 November 2021)**

### Message from the Guest Editors

Dear colleagues,

The aim of this Special Issue of *Cells* is to report new findings that advance knowledge of the molecular mechanisms of organ fibrosis. We welcome submissions of research papers and reviews that focus on aspects of known mechanisms/pathways such as epithelial–mesenchymal transition, TGF-beta signaling, myofibroblast activation, proliferation, and senescence, but also manuscripts exploring new aspects.

#### • **Keywords**

- organ fibrosis
- epithelial–mesenchymal transition
- TGF-beta signaling
- myofibroblast activation
- proliferation
- senescence

## Editors-in-Chief

**Prof. Dr. Alexander E. Kalyuzhny**

Neuroscience, UMN Twin Cities,  
6-145 Jackson Hall, 321 Church St  
SE, Minneapolis, MN 55455, USA

**Prof. Dr. Cord Brakebusch**

Biotech Research & Innovation  
Centre, The University of  
Copenhagen, Copenhagen,  
Denmark

## Message from the Editorial Board

*Cells* has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [CAPlus / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (*Cell Biology*) / CiteScore - Q1 (General Biochemistry, Genetics and Molecular Biology)
