## Role of Mitochondria in Environmentally and Dietary Modulated Age-Associated Diseases

Guest Editors:

### **Dr. Natascia Ventura**

Mitochondria in Environmentally Induced Neuronal Aging and Pathologies, Institute of Clinical Chemistry and Laboratory Diagnostics, Medical Faculty, University of Duesseldorf and the Leibniz Research Institute for Environmental Medicine, Dusseldorf, Germany

### **Prof. Dr. Judith Haendeler**

1. Cardiovascular Degeneration, Haendeler Group, Clinical Chemistry and Laboratory Diagnostics, Medical Faculty, University Hospital, Heinrich-Heine University Duesseldorf, 40225 Duesseldorf, Germany  
2. Cardiovascular Research Institute Dusseldorf (CARID), Medical Faculty, University Hospital, Heinrich-Heine University Duesseldorf, 40225 Duesseldorf, Germany

### Message from the Guest Editors

Aging is the most important risk factor for the development of a large number of disorders. Genetic factors, but more prominent environmental factors including diet concurrently shape human health and aging.

Mitochondria are key players in the aging process. The focus of this special issue will be to highlight our current knowledge on the important role of mitochondria in environmentally including dietary modulated aging and associated diseases.

Moreover, relevant manuscripts will primarily investigate novel underlying molecular mechanisms of environmental factors in modulating mitochondrial or mitochondria-related intracellular functions with direct consequences on aging and associated diseases, along with possible targeted preventive or therapeutic strategies.

Deadline for manuscript submissions:

**closed (15 November 2021)**

## Editors-in-Chief

**Prof. Dr. Alexander E.  
Kalyuzhny**

Neuroscience, UMN Twin Cities,  
6-145 Jackson Hall, 321 Church St  
SE, Minneapolis, MN 55455, USA

**Prof. Dr. Cord Brakebusch**

Biotech Research & Innovation  
Centre, The University of  
Copenhagen, Copenhagen,  
Denmark

## Message from the Editorial Board

*Cells* has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [CAPus / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (*Cell Biology*) / CiteScore - Q1 (General Biochemistry, Genetics and Molecular Biology)
