Molecular Basis of Brain Tumors

Guest Editors:

Dr. Chun Zhang Yang

Neuro-Oncology Branch, Center for Cancer Research, National Cancer Institute, Bethesda, MD, USA

Dr. Prashant Chittiboina

National Institute of Neurological Disorders and Stroke (NINDS), Bethesda, MD, USA

Deadline for manuscript submissions:

closed (1 June 2021)

Message from the Guest Editors

Brain tumors, the neoplastic disease derived from the central nervous system (CNS), are highly heterogeneous diseases, reflected by their diversified genetics, morphology, and disease outcome. Primary brain tumors are derived from a variety of cellular origins in the CNS, which exhibit distinctive phenotypes, ranging from benign tumors (e.g. pituitary adenoma and hemangioblastoma) to highly aggressive cancers (e.g. glioblastoma, gliosarcoma, and diffuse intrinsic pontine glioma). Advances in cancer genetics, cancer metabolomics and biomarker studies of brain tumors have led improved understanding of brain tumors.

This Special Issue will cover the critical aspects of the molecular biology of brain tumors, including the conceptual advances in biochemistry, cancer biology, epigenetics, tumor microenvironment, and immunology. Original research articles and systemic reviews to these topics are cordially encouraged to comment on the cutting edges in brain tumor research and future directions.

SE, Minneapolis, MN 55455, USA

Prof. Dr. Cord Brakebusch

Biotech Research & Innovation
Centre, The University of
Copenhagen, Copenhagen,
Denmark

Message from the Editorial Board

Cells has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Cell Biology*) / CiteScore - Q1 (General Biochemistry, Genetics and Molecular Biology)
