Deadline for manuscript
submissions:

closed (31 August 2022)

Message from the Guest Editor

Dear Colleagues,

In the present Special Issue of *Cells*: “Neural Stem Cells: Developmental Mechanisms and Disease Modelling,” authors are cordially invited to contribute articles presenting original data as well as reviews updating progress in the neural stem cells field, including molecular mechanisms of neurogenesis and modelling of neural disorders and modern technologies implemented to enable such progress.

The molecular mechanisms of different aspects of conventional and direct reprogramming strategies leading to specific neuronal subtypes as well as major achievements in brain organoid technology modelling neurodevelopment and disease are greatly welcome in this Special Issue.

We are looking forward to your contributions to this Special Issue.

Copenhagen, Copenhagen,
Denmark

Message from the Editorial Board

Cells has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Cell Biology*) / CiteScore - Q1 (General Biochemistry, Genetics and Molecular Biology)
