## State-of-Art in Neuromuscular Diseases

Guest Editor:

### **Dr. Mehdi Ghasemi**

Department of Neurology,  
University of Massachusetts  
School of Medicine, Worcester,  
MA 01655, USA

Deadline for manuscript  
submissions:

**closed (15 April 2023)**

### **Message from the Guest Editor**

This special issue of “Neuromuscular Disorders” is aimed at a wide range of clinicians, pathologists, geneticists, and clinical and basic scientists with an interest in the study of neuromuscular disorders. The editorial team welcome high-quality original research articles, review articles, and communications (including opinion and hypothesis papers) covering all aspects of neuromuscular disorders in childhood and adult life, with a focus on advances in the fields of molecular biology and genetics, translational research, drug development, clinical trials, and improvement of clinical trial outcome measures and biomarkers in a wide variety of neuromuscular disorders, which include, without being limited to:

- Motor neuron diseases
- Amyotrophic lateral sclerosis – frontotemporal dementia spectrum
- Spinal muscular atrophies
- Hereditary or acquired neuropathies
- Muscular dystrophies
- Congenital myopathies
- Myotonic syndromes
- Metabolic myopathies
- Inflammatory myopathies
- Myasthenia gravis and other neuromuscular junction disorders

## Editors-in-Chief

### **Dr. Alexander E. Kalyuzhny**

Dental Basic Sciences, University of Minnesota, 308 Harvard St. SE, Minneapolis, MN 55455, USA

### **Prof. Dr. Cord Brakebusch**

Biotech Research & Innovation Centre, The University of Copenhagen, Copenhagen, Denmark

## Message from the Editorial Board

*Cells* has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [CAPlus / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (Cell Biology) / CiteScore - Q1 (General Biochemistry, Genetics and Molecular Biology)
