Dr. Francesco Carimi

Institute of Biosciences and BioResources, Division of Palermo, National Research Council, Via Ugo La Malfa, n° 153, I-90146 Palermo, Italy

Deadline for manuscript submissions:

closed (15 June 2022)

Message from the Guest Editors

Dear Colleagues,

This Special Issue of *Cells* aims to publish original research articles, reviews, or shorter perspective articles on all aspects related to the omics approaches to advancing the knowledge and the genetic dissection of agronomic complex traits of interest. Especially, studies applying omics technologies and exploring their possible integration through bioinformatic approaches as tools to support future crop breeding programs are welcome.

Keywords

- next-generation sequencing (NGS)
- genomics
- transcriptomics
- proteomics
- metabolomics
- phenomics
- QTLs mapping
- genome-wide assisted selection (GWAS)
- crop breeding

Centre, The University of
Copenhagen, Copenhagen,
Denmark

Message from the Editorial Board

Cells has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Cell Biology*) / CiteScore - Q1 (General Biochemistry, Genetics and Molecular Biology)
