Department of Pharmaceutical Sciences, College of Pharmacy and Health Sciences, St. John's University, New York, NY 11439, USA

Deadline for manuscript submissions:

**closed (15 February 2023)**

### Message from the Guest Editor

Dear Colleagues,

Signal Transducer and Activator of Transcription 3 (STAT3) is a transcription factor that regulate many important cellular and biological functions in normal and transformed cells. The STAT3 signaling pathway regulation is highly diverse and is involved in normal development and oncogenesis. Furthermore, STAT3 also regulate the normal stem cells and cancer stem cells development and functions. Given the importance of STAT3 signaling pathway, development of anti-STAT3 pharmacological approaches and concerted translational research efforts are much needed. In this special issue of *Cells*, we invite authors to contribute original research and review articles focusing on different aspects of STAT3 signaling pathway, role in cancer onset and progression, role in stem cells and cancer stem cells. We also invite articles on anti-STAT3 pharmacological approaches, therapeutic strategies, and clinical studies. The collected articles in this special issue will further enhance our knowledge for the role of STAT3 signaling in cancer and stem cells and hopefully will drive the development of novel therapeutic strategies.

## Editors-in-Chief

### **Prof. Dr. Alexander E. Kalyuzhny**

Neuroscience, UMN Twin Cities,  
6-145 Jackson Hall, 321 Church St  
SE, Minneapolis, MN 55455, USA

### **Prof. Dr. Cord Brakebusch**

Biotech Research & Innovation  
Centre, The University of  
Copenhagen, Copenhagen,  
Denmark

## Message from the Editorial Board

*Cells* has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [CAPus / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (*Cell Biology*) / CiteScore - Q1 (*General Biochemistry, Genetics and Molecular Biology*)
