## Emerging Use of Stem Cells in Personalized Medicine

Collection Editors:

### **Dr. Radbod Darabi**

Center for Stem Cell and Regenerative Medicine (CSCRM), The Brown Foundation Institute of Molecular Medicine for the Prevention of Human Diseases (IMM), University of Texas Health Science Center at Houston, Houston, TX 77030, USA

### **Prof. Dr. Yong Li**

Chief of BioMedical Engineering, Department of Orthopaedic Surgery, Homer Stryker M.D. School of Medicine, Western Michigan University Kalamazoo, MI 49008, USA

### **Message from the Collection Editors**

In the last decade, personalized medicine has gained much traction and has pushed the limits of what we can achieve clinically. Most disease, trauma, and infectious pathologies are consequences of cellular damage at differing levels. The key to mitigating cell and/or tissue damage repair is cell therapy. Stem cell therapy is a promising treatment that can be tailored not only to an illness but also to an individual patient.

Personalized medicine through stem cell therapy has many essential benefits for the future of personal health. The current Collection will accept studies and reviews in all fields of personalized medicine. In addition, stem cell-related studies on basic science and translational applications in personalized medicine will be welcomed. The goal of this Collection is to provide an overview of novel studies and updated classical studies in personalized medicine.

## Editors-in-Chief

**Prof. Dr. Alexander E. Kalyuzhny**

Neuroscience, UMN Twin Cities,  
6-145 Jackson Hall, 321 Church St  
SE, Minneapolis, MN 55455, USA

**Prof. Dr. Cord Brakebusch**

Biotech Research & Innovation  
Centre, The University of  
Copenhagen, Copenhagen,  
Denmark

## Message from the Editorial Board

*Cells* has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [CAPus / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (*Cell Biology*) / CiteScore - Q1 (General Biochemistry, Genetics and Molecular Biology)
