Special Issue

Multifunctional Cytoskeleton Network in Human Diseases: Mutual Risk of Dementia, Cancer and COVID-19

Message from the Guest Editors

This Special Issue is intended to contribute significantly to the development of anti-COVID-19 strategies by collecting and publishing innovative concepts, suggestions and research data for the identification and validation of specific drug targets. This Issue focuses on the characterization of the SARS-CoV-2-cytoskeleton relationship emphasizing the importance of the destruction of the filament systems to viral pathogenesis. The virus-cytoskeleton relationship could be effectively and specifically modified by peptidomimetic foldamers, oligonucleotide-based aptamers or drug-like compounds used successfully as anti-viral or anti-mitotic agents for treatments of other diseases. Keywords: coronaviruses; viral infection; cytoskeletal microtubules; physiological and pathological interactions; transmission and trafficking; drug targeting

About the Journal

Message from the Editorial Board

Cells has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

Editors-in-Chief

Dr. Alexander E. Kalyuzhny
Dental Basic Sciences, University of Minnesota, 308 Harvard St. SE, Minneapolis, MN 55455, USA

Prof. Dr. Cord Brakebusch
Biotech Research & Innovation Centre, The University of Copenhagen, Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Cell Biology) / CiteScore - Q1 (General Biochemistry, Genetics and Molecular Biology)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2024).
