submissions:

**31 December 2024**

### Message from the Guest Editors

Dear Colleagues,

Electronic ceramics are characterized by their unique properties, making them indispensable in various applications, including integrated circuits, microwave communication, packaging ceramics, energy storage, energy generation, and optoelectronics. In recent years, electronic ceramics have undergone significant developments driven by the increasing demands of modern technology.

These advances have profoundly impacted various industries, as electronic ceramics have become fundamental components of a wide range of electronic devices.

To further foster the growth of electronic ceramics and address current and future challenges in the field, a Special Issue titled "Advanced in Electronic Ceramics" has been launched. This dedicated platform focuses on topics such as synthesis procedures, crystal structures, and the functional characteristics of electronic ceramics. It aims to facilitate the progression of electronic ceramics and their pivotal role in the ever-evolving landscape of technology.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

*Ceramics* (ISSN 2571-6131), an international, open access journal, provides an advanced forum for ceramics science and engineering. Research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We are committed to drive *Ceramics* to a position in which it is recognized for its high-quality, cutting-edge research and scientific influence, and strongly encourage and invite your participation and manuscripts. Your contribution should lead to the development of technical ceramics with better performances and to improve our quality of life.

## Author Benefits

**Open Access:** free for readers, with **article processing charges (APC)** paid by authors or their institutions.

**High Visibility:** indexed within **Scopus**, **ESCI (Web of Science)**, and **other databases**.

**Journal Rank:** JCR - Q1 (Materials Science, Ceramics) / CiteScore - Q2 (*Materials Science (miscellaneous)*)
