Deadline for manuscript
submissions:

closed (31 May 2017)

Message from the Guest Editor

This Special Issue in “Biosensors Applications in Food Safety” will include the latest developments and advances in biosensors developed for food safety, comprising new sensor fabrication technologies, the emerging synthetic receptors and nanomaterials used for their construction. Emphasis will be placed on applications for pathogenic microorganisms and their toxins, plants toxins, pesticides residues and other environmental pollutants, food additives, and allergens. These are some of the examples of what this Special Issue will cover.

- Biosensors
- Nanomaterials
- biomimics
- Bacteria
- viruses
- fungi
- mycotoxins
- endotoxins
- phytotoxins
- pesticides
- herbicides
- food additives
- metals

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Chemosensors continues to grow as a forum for all manners of sensing that encompass chemistry. *Chemosensors* is published in open access format – all articles and content are released on the internet immediately following acceptance, thus allowing unlimited access to the content as soon as it is published. We would be happy to have you join our growing list of authors.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [CAPlus / SciFinder](#), [Inspec](#), and [other databases](#).

Journal Rank: JCR - Q1 (Instruments and Instrumentation) / CiteScore - Q2 (*Analytical Chemistry*)
