Message from the Guest Editors

Dear Colleagues,

Chronic conditions are a major concern worldwide. The dramatic increase in chronic conditions (e.g., diabetes, cancer, cardiovascular diseases, respiratory diseases, mental illness) across the globe has demanded immediate and creative actions to provide solutions for a plethora of unmet needs. Affordable rapid biosensors could greatly reduce the global disease burden, especially in chronic disease diagnosis as well as early cancer screening.

This Special Issue will cover the recent advances in biosensors and their applications in monitoring chronic conditions in point-of-need settings. This Special Issue welcomes high-quality publications, including reviews, perspectives, communications, and research articles, related to recent advances in biosensors for the diagnosis and treatment of chronic conditions.

Message from the Editorial Board

Chemosensors continues to grow as a forum for all manners of sensing that encompass chemistry. *Chemosensors* is published in open access format – all articles and content are released on the internet immediately following acceptance, thus allowing unlimited access to the content as soon as it is published. We would be happy to have you join our growing list of authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, Engineering Village and other databases.

Journal Rank: JCR - Q1 (Instruments and Instrumentation) / CiteScore - Q2 (*Analytical Chemistry*)
