Message from the Guest Editors

This Special Issue on “Chemometrics for Multisensor Systems and Artificial Senses” will include but is not limited to the following topics:

- Development and applications of chemical sensors and multisensor systems;
- Chemometric approaches in multivariate signal processing;
- Intelligent data processing algorithms for analytical signal sampling and quantization;
- Chemometric feature extraction and separation of overlapping components;
- Signal normalization, standardization, optimization, and baseline correction;
- Software for signal processing.

New research and ideas for novel chemical sensors and multisensor systems development and application, including signal processing details, are strongly invited to be a part of this Special Issue. We hope to inspire further interest and new research efforts in this exciting area.
