Deadline for manuscript  
submissions:

**closed (15 June 2022)**

### Message from the Guest Editors

Chemosensor-based organic thin film transistors or organic field effect transistors have the advantages of excellent processability using high-throughput printing techniques, mechanical robustness, tunable selectivity to various analytes, and compatibility to plastic or other flexible substrates. Therefore, chemosensors based on organic thin film transistors are particularly suitable for certain emerging applications, such as wearable electronics, electric skin, electric nose, and soft robotics.

This special issue aims to provide researchers with a platform to showcase the latest developments in the field of chemosensors based on organic thin film transistors. The topics can be but is not limited to:

- Functional organic (small molecules or polymers) semiconductors, gate dielectrics, and electrodes;
- New material processing and device fabrication techniques;
- New device design;
- Applications of chemosensors based on organic thin film transistors;
- Devices inducing chemical, biological sensors, phototransistors, thermal sensors, pressure sensors, water-gated sensors, electrochemical sensors, etc.

## Editor-in-Chief

### Prof. Dr. Nicole Jaffrezic-Renault

Institute of Analytical Sciences,  
UMR CNRS 5280, Department  
LSA, 5 Rue de La Doua, 69100  
Villeurbanne, France

## Message from the Editor-in-Chief

*Chemosensors* continues to grow as a forum for all manners of sensing that encompass chemistry. *Chemosensors* is published in open access format – all articles and content are released on the internet immediately following acceptance, thus allowing unlimited access to the content as soon as it is published. We would be happy to have you join our growing list of authors.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, Engineering Village and other databases.

**Journal Rank:** JCR - Q1 (Instruments and Instrumentation) / CiteScore - Q2 (*Analytical Chemistry*)
