Fluorescent Probe for Sensing and Bioimaging

Guest Editors:

Prof. Dr. Lintao Zeng

School of Light Industry and Food Engineering, Guangxi University, Nanning 530004, China

Prof. Dr. Minhuan Lan

College of Chemistry and Chemical Engineering, Central South University, Changsha 410083, China

Deadline for manuscript submissions: closed (30 November 2023)

Message from the Guest Editors

Ever since the discovery of organic fluorescent compounds in the late nineteenth century, efforts have been made to "see" the behaviors of specific biomolecules in living systems by using these dyes as labels, and as a novel kind of promising fluorescent probes for high-performance sensors and bioimaging because of their strong luminescence, good photostability, and excellent biocompatibility.

Fluorescent probes with a highly sought reversible feature can provide a real-time monitor of the concentration dynamics (increases and decreases) of such chemical species, and thus are ideally suited to understand the physiological function. They have been developed rapidly due to their wide application in various fields.

This Special Issue will provide a forum for the latest research activities in the field of fluorescent/luminescent probe. Both review articles and original research papers are solicited in, though not limited to, the following areas:

- 1. Fluorescent/luminescent probe for sensing or imaging;
- 2. Emerging application of fluorescent/luminescent material;

Specialsue

- 3. Fluorescence/colorimetric analysis;
- 4. The mechanism research on the biomedical.

Message from the Editor-in-Chief

Chemosensors is an international, scientific, open access journal on the science and technology of chemical sensors published by MDPI. All articles are released on the internet immediately following acceptance. The journal publishes reviews, regular research papers, and communications. The scope of Chemosensors includes: New chemical sensors design Electrochemical devices, potentiometric sensor, redox electrode Optical chemical sensors Analytical methods Environmental monitoring Gas detectors electronic nose, etc.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q1 (*Instruments & Instrumentation*) / CiteScore - Q2 (*Analytical Chemistry*)
