Technology, China Jiliang
University, Hangzhou 310018,
China

Deadline for manuscript
submissions:

closed (29 February 2024)

Message from the Guest Editor

Significant developments have been achieved in the fields of chemosensors, nanosensors, and lab-on-a-chip systems through the utilization of novel functional materials, structures, devices, and systems at the nano- and microscale, providing improved sensing performances. The aim of this Special Issue is to explore recent progress related to these research fields for gas detection and its applications.

This Special Issue aims to publish state-of-the-art original articles and comprehensive reviews covering gas detection sensors for on-chip applications. Contributions may include different aspects in terms of novel design, fabrication, chemistry, analysis, applications perspectives, and so on.

The topics that will be covered include (but are not limited to):

- Optical fiber sensors;
- Pressure, temperature, humidity sensors for gas detections;
- Novel gas sensor lab-on-a-chip devices;
- Novel nano- and micromaterials for gas detections.

an Open Access Journal by MDPI

Message from the Editorial Board

Chemosensors continues to grow as a forum for all manners of sensing that encompass chemistry. *Chemosensors* is published in open access format – all articles and content are released on the internet immediately following acceptance, thus allowing unlimited access to the content as soon as it is published. We would be happy to have you join our growing list of authors.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [CAPlus / SciFinder](#), [Inspec](#), [Engineering Village](#) and [other databases](#).

Journal Rank: JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Physical and Theoretical Chemistry)
