### Message from the Guest Editors

Chitosan is well known for its qualities of biocompatibility, its preservation of biomolecules, and its anti-fouling properties. The aim of this Special Issue is to be a forum for the latest research activities showing the role of the chitosan in the improvement of the qualities of chemosensors: sensitivity, selectivity, shelf lifetime in real environments, sustainability.

We are seeking papers researching the following areas:

- Elaboration of chemosensors
- Elaboration of biosensors
- Molecularly imprinted polymers-based chemosensors
- Anti-fouling properties for implanted chemosensors
- Chitosan-based chemosensors for food control
- Chitosan-based chemosensors for environmental control
- Chitosan-based chemosensors for biomedical applications
