

## Special Issue

# Innovative Materials, Technologies, and Sensors

### Message from the Guest Editors

Progress in technology and engineering is greatly affected by the development of advanced functional materials with improved properties. However, the insecure supplies of critical materials (i.e., rare-earth or Co) could hinder the development of new technologies related to massive applications. Accordingly, the development of novel technologies and applications is critically affected by the development of new cost-effective materials and by the improvement of the physical properties of existing materials.

The overall goal of this Special Issue is to provide the most up-to-date information about recent developments of cost-effective and innovative materials with advanced functional properties, made suitable for technological applications. Both reviews and original research papers will be considered. Reviews should provide an up-to-date, well-balanced overview of the current state of the art of a particular application and include main results from different groups. For more information, please check out [here](#).

---

### Guest Editors

Prof. Dr. Arcady Zhukov  
Prof. Dr. Tatiana Perova  
Prof. Dr. Valentina Zhukova

## About the Journal

### Message from the Editorial Board

*Chemosensors* continues to grow as a forum for all manners of sensing that encompass chemistry. *Chemosensors* is published in open access format – all articles and content are released on the internet immediately following acceptance, thus allowing unlimited access to the content as soon as it is published. We would be happy to have you join our growing list of authors.

### Editors-in-Chief

Prof. Dr. Jin-Ming Lin

Beijing Key Laboratory of Microanalytical Methods and Instrumentation,  
Department of Chemistry, Tsinghua University, Beijing 100084, China

Prof. Dr. Nicole Jaffrezic-Renault

Institute of UTINAM, University of Franche-Comté, UMR-CNRS 6213, 16  
Gray Road, 25030 Besançon, France

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPus / SciFinder, Inspec, Engineering Village and other databases.

#### Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Physical and Theoretical Chemistry)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 19.1 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2025).
