### Message from the Guest Editors

The aim of this Special Issue is to collect the most recent evidence on assessments and rehabilitative interventions for neuromotor disabilities in children. The manuscripts may include submissions of any format (e.g., original article, case report, review or systematic review) that may contribute to this goal. This includes, but is not limited to, manuscripts on cerebral palsy, neuromuscular diseases, ataxic or dyskinetic disorders, and congenital abnormalities. Equally important will be the inclusion of reports or protocols about correlating clinical features and defining functional profiles, which may help in developing targeted approaches in the future.

We look forward to receiving your contributions.
