### Message from the Guest Editors

Dear Colleagues,

As pediatric medicine and maxillofacial surgery advance at an unprecedented pace, understanding and treating facial injuries in children becomes increasingly pivotal. This Special Issue is dedicated to exploring the historical background and current state of knowledge of pediatric facial fractures, with an emphasis on their unique clinical aspects and treatment options. Our aim is to showcase the latest research and innovations in this field that could contribute to improved treatment outcomes for young patients. We invite submissions of original research, case studies, systematic reviews and meta-analyses that offer new insights into the diagnosis, treatment and long-term care of children with facial injuries.

Deadline for manuscript  
submissions:

**closed (30 October 2024)**
