Deadline for manuscript submissions:

5 January 2025

Message from the Guest Editors

Although significant advances have been achieved in perinatology and intensive neonatal care, rates of neonatal morbidity and adverse sequelae remain high.

Systematic antenatal care, the diagnosis and treatment of maternal infections, the detection of perinatal risk factors and focused neonatal care are key aspects of both reducing neonatal morbidity and improving neonatal prognosis. Intrapartum- and prematurity-related complications are closely related to neonatal morbidity.

This Special Issue is an update on current advances pertaining to the prevention, prevalence, risk factors, diagnosis, etiology, pathophysiology, treatment, as well as short- and long-term neurodevelopmental outcomes of several neonatal critical conditions. We encourage submissions that investigate and demonstrate new perspectives and discuss future challenges regarding neonatal morbidity. Finally, this Special Issue aims to highlight the pivotal role of the interdisciplinary team in the neonatal period, raise awareness of novel biomarkers and effective pharmacological and non-pharmacological therapies, and enhance the understanding of family dynamics in special populations.

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [Embase](#), and [other databases](#).

Journal Rank: JCR - Q2 (Pediatrics) / CiteScore - Q2 (Pediatrics, Perinatology and Child Health)
