submissions:

**closed (30 April 2023)**

### Message from the Guest Editor

Dear Colleagues,

Exome and genome sequencing (ES/GS) exert profound influence on clinical care by ushering precision medicine into routine practice. Superior to conventional genetic tests in their ability to identify disease-causing variants in certain pediatric patient populations, these technologies are gaining traction as a gold standard diagnostic. However, further evidence of their value, value for money, and ethically appropriate use as diagnostic tools in the prenatal and early postnatal period is warranted. Beyond the diagnostic application of these technologies for prenatal, early postnatal, and pediatric care, attention is turning to their application to prenatal and newborn *screening*, where no a priori indication for testing exists. Arguably, the recommended reporting of secondary findings identified in the context of diagnostic applications of ES/GS suggests that the use of these technologies as screening tools is already taking place. While understanding the DNA code of an apparently healthy fetus, a newborn baby, or a young child may provide invaluable guidance and optimize individual and family health outcomes, harmful consequences are also plausible.

## Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [Embase](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (Pediatrics) / CiteScore - Q2 (Pediatrics, Perinatology and Child Health)
