Deadline for manuscript  
submissions:

**1 November 2024**

### Message from the Guest Editors

Dear Colleagues,

The WHO recommends the enhancement of both the quality and quantity of data on morbidity and outcomes of children's injuries. This will facilitate targeted investment in injury prevention. Causes of injuries in infants, children and teenagers have a broad spectrum and a variety of causes, as sometimes the anatomical regions of interest vary between different age groups. Further, children and teenagers are often curious and tend to be more available to participate in sports trends with kick-scooters, skateboarding, snowboarding, on trampolines, etc. Therefore, the identification of injury patterns will always be of great interest, as will their prevention and therapy. In the case of growing injuries, it is important to minimize possible long-term effects. Depending on the child's age, the potential of spontaneous correction of fractures is different. This potential and the prognosis is not only age-related but more linked to the overall biological maturity of the patient. Therefore, it would be of interest if changes in fracture types and patterns have occurred among children and teenagers.

## Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [Embase](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (Pediatrics) / CiteScore - Q2 (Pediatrics, Perinatology and Child Health)
