Deadline for manuscript submissions:

10 December 2024

Message from the Guest Editors

Dear Colleagues,

The field of paediatric gastrointestinal and hepatobiliary surgery care is rapidly expanding thanks to advancements in intraoperative lesion identification and accumulated experience in robotic surgery, as well as the improved pre- and postoperative care of these patients; however, more research is needed to optimise outcomes.

Paediatric gastrointestinal and liver surgery includes different surgical procedures that are the main indication for surgery within the paediatric population, both emergency and elective. The minimally invasive laparoscopic approach has become the mainstay in recent years, although robotic surgery is beginning to be integrated.

The focus of this Special Issue is on all aspects of paediatric gastrointestinal and hepatobiliary surgery, addressing new advances and controversies. Particularly, we aim to highlight novel and ongoing research on new intraoperative visualisation techniques, such as fluorescent markers and advances in robotic surgery (both gastrointestinal and robotic), as well as improvements and advances in the pre- and postoperative care of complex patients requiring this type of surgery.

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [Embase](#), and [other databases](#).

Journal Rank: JCR - Q2 (Pediatrics) / CiteScore - Q2 (Pediatrics, Perinatology and Child Health)
