### Message from the Guest Editors

Dear colleague,

Juvenile idiopathic arthritis (JIA) is the most common chronic joint disease in pediatric rheumatology and encompasses a heterogeneous group of disorders. JIA is one of the major potential causes of permanent joint inability in childhood, and extra-articular complications such as chronic uveitis could significantly impact its morbidity. Systemic JIA is increasingly recognized as a specific entity with a peculiar crosstalk between the innate and adaptative immune system, and its life-threatening complication, the macrophage activation syndrome, requires prompt recognition and appropriate treatment.

The continuous improvements in translational research, the widespread use of intra-articular glucocorticoids, and the increasing availability of a broad spectrum of innovative therapies that are tailor-made to all different subsets of JIA have resulted in a dramatic change in the way to approach the disease and to a significant improvement of long-term outcomes.

The goal of this Special Issue is to explore all these aspects by pointing out the state-of-the-art knowledge based on daily clinical experience and on evidence from literary reviews.

## Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [Embase](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (Pediatrics) / CiteScore - Q2 (Pediatrics, Perinatology and Child Health)
