Message from the Guest Editor

Dear Colleagues,

As Guest Editor of the Special Issue entitled “Clinical Advances and Perspectives on Neonatal Surgery”, it is with great pleasure that I invite you to submit your works to *Children*.

As we all know, the advancement of diagnostic techniques and surgical methods has enabled many malformations and neonatal conditions to be properly managed. The technical surgical aspects have been implemented together with a more comprehensive knowledge of the fetal and neonatal physiology, thus allowing for substantially improved outcomes of many neonatal surgical conditions.

This Special Issue aims to collect and share the most recent clinical and research advancements in the treatment of those malformations that require prompt and skilled surgical expertise.
