Message from the Guest Editor

Dear Colleagues,

Patients with multiple chronic conditions occupy a growing percentage of beds in children's hospitals and utilize a disproportionate share of health care resources. Greater attention to this population has the potential to improve quality of care and simultaneously reduce its cost.

In this Special Issue in *Children* we focus on children with medical complexity. We seek to assemble a collection of reviews exploring the care of this important group of children.

We look forward to receiving your contributions. We are interested in the medical care of this population, as well as social and epidemiological aspects.
