Message from the Guest Editors

Dear Colleagues,

We would like to inform you about our decision of organizing a “Special Issue” on the “Advances in the Treatment of Congenital Cardiovascular Malformations in Children”.

The management of complex congenital heart defects involves many aspects, including the diagnostic procedures, the indications for treatment, the interventional and surgical procedures, and the post-operative management, starting from the fetal life through the pediatric age, with long-term effects.

Therefore, we invited worldwide known colleagues, involved in all these steps of the management of complex congenital heart defects, to provide us with the state-of-the-heart advanced treatment, based on their research projects as well as on the translation in their clinical experience.

The collection of all the scientific contributions will certainly constitute the timely gold standard, to follow as guidelines in the years to follow.

The format proposed will facilitate the free consultation of all the published contributions, which will be made available to all the readers involved in the management of the children with complex congenital heart defects.

Departments of Child Health and Neurology, University of Missouri, 400 Keene Street, Columbia, MO 65211, USA

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [Embase](#), and [other databases](#).

Journal Rank: JCR - Q2 (Pediatrics) / CiteScore - Q2 (Pediatrics, Perinatology and Child Health)
