### **Message from the Guest Editor**

The field of developmental and behavioral pediatrics constitutes a relatively new pediatric subspecialty and focuses on the understanding of functional changes in all domains of child and adolescent development, including language, movement, cognitive function, and social-emotional development. The field also focuses on the assessment of children with, or at risk of, neurodevelopmental and behavioral difficulties.

Considering the success and popularity of the Special Issue "Developmental and Behavioral Pediatrics" previously published in the journal *Children* ([https://www.mdpi.com/journal/children/special\\_issues/Develop](https://www.mdpi.com/journal/children/special_issues/Develop)) we are now releasing a Second Issue aiming to gather original research papers and review articles focused on developmental and behavioral pediatrics. In this Special Issue of *Children*, senior investigators are welcome to invite mentees and colleagues to co-author submissions under their supervision. We look forward to receiving your contributions.
