Decision Making at the Border of Viability and in Critically Ill Newborn Infants

Guest Editors:

Prof. Dr. Harald Ehrhardt

Department of Pediatrics & Adolescent Medicine, Divisional Head Neonatology & Pediatric Intensive Care Medicine, University Medical Center Ulm, Ulm University, Eythstraße 24, D-89075 Ulm, Germany

Dr. Silke Mader

Founder and Chairwoman of the Board - European Foundation for the Care of Newborn Infants, Hofmannstr. 7A, 81379 Munich, Germany

Deadline for manuscript submissions:

closed (5 April 2024)

Message from the Guest Editors

Dear Colleagues,

The tremendous advances in neonatal medicine in recent years have made it possible for very immature preterm infants to survive. Newborn infants with complex and severe congenital disorders and malformations can be offered therapeutic interventions to prolong life and possibly even fully repair congenital defects. In the care of preterm and ill newborns, parents and the professional team have to consider neurodevelopmental outcome, disability-free survival, and quality of life in addition to survival alone when deciding on initiation, continuation, or discontinuation of active therapy. The right to live might come into conflict with the idea of perfect health in a situation where the patient's presumed will cannot be determined. On the other hand, the right to die in a futile situation might come into conflict with parents' or the professional team's resistance to end therapy. We hope to help clinicians through this Special Issue to be able to better counsel parents and guide them through the "decision-making process".

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [Embase](#), and [other databases](#).

Journal Rank: JCR - Q2 (Pediatrics) / CiteScore - Q2 (Pediatrics, Perinatology and Child Health)
