Message from the Guest Editors

Dear Colleagues,

Recent scientific developments in the field of allergic and immunological diseases have paved the way for improving the management of these conditions. The sphere of pathophysiology requires continuous updating due to the introduction of new therapies, biologic treatments and genetic studies as our understanding of environmental influence on allergic diseases is refined. The aim of this Special Issue is to encourage researchers to share their findings and to present innovations that have emerged over the last year. Reviews on epidemiology, mechanisms, clinical features and treatment are also of interest. We welcome original articles, review articles, and mini review articles.

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, and other databases.

Journal Rank: JCR - Q2 (Pediatrics) / CiteScore - Q2 (Pediatrics, Perinatology and Child Health)
